

## MINERAL COUNTY NUCLEAR PROJECTS OFFICE NEWS

### 2009 Community Survey Results

L to R: Devin Loughry, Brianna Paulson, Nicole Mathias

Mineral County High School National Honor Society Students completed approximately 209 surveys regarding the Yucca Mountain Project, in order to ascertain the views and knowledge of the repository program and nuclear energy. The Mineral County community survey focused on questions and issues that have been the subject of national survey efforts, related nuclear energy and Yucca Mountain.

This is a yearly effort by the Mineral County Nuclear Projects Office to ascertain the views of Mineral County residents about nuclear issues. This yearly effort utilizes our local High School students to perform the survey in exchange for scholarship monies. All of the students did an exceptional job and we thank them for their efforts. Pictured above are three of the students who gave a presentation of the survey results to the Mineral County Commissioners on May 6, 2009. To view the entire survey and its results please refer to our website at [www.mcnucprojects.com](http://www.mcnucprojects.com).
